## PROFILE

Full-stack software engineer who works directly with international clients in their own language — fluent in Arabic (native), English (C2) and Russian (B2). I take products end to end (FastAPI, React, PostgreSQL) and own the client side too: discovery, requirements, demos and handover. A natural bridge for teams serving English-speaking or MENA/GCC markets — an engineer who ships and speaks to the client. Available remotely worldwide; open to relocation.

## SELECTED HIGHLIGHTS

- **Trilingual** — Arabic (native), English (C2, full professional), Russian (B2): work directly with clients across MENA, the GCC, CIS and English-speaking markets.
- Single point of accountability on freelance projects — from client discovery and requirements (SRS) through architecture, build and handover.
- Sole owner of a **multi-tenant ERP** (FastAPI, PostgreSQL RLS, React) with Saudi ZATCA e-invoicing and full Arabic/English RTL — built for a specific regional market.
- Own the client side and UX of a **live e-commerce platform**, with zero-downtime releases.
- Led teams of up to **10**, translating between client needs and technical delivery.

## SKILLS

**Engineering:** JavaScript, React, Node.js, Python, FastAPI, PostgreSQL, Docker, Flutter/Dart, REST APIs

**Client & delivery:** Discovery interviews, requirements/SRS, demos, stakeholder communication, agile, release and handover

**Languages:** Arabic — native · English — C2, full professional · Russian — B2

**Localization:** Arabic/English RTL, Saudi ZATCA e-invoicing, multi-market products

**Also:** PyTorch, computer vision, reinforcement learning; team leadership up to 10

## EXPERIENCE

### Full-Stack Developer / Technical Owner | HMS

January 2024 — Present

- Own the corporate web product end to end — requirements from stakeholders, architecture, front and back end, release and support.

### Full-Stack Developer / Product Delivery Owner | AuraGift

January 2024 — Present

- Own the client side and UX of a live premium e-commerce platform; repeatable Firebase deployments with no downtime.

### Technical Project Manager / Product Engineer | Freelance

June 2022 — Present

- Single point of accountability from discovery and SRS through architecture, build and handover.
- Led a team of 10 on an AI logistics system, ~\$13,000 budget, 11 months.

### Technical Project Lead / Full-Stack Developer | HMS

January 2023 — June 2023

- Led a team of 8 and managed a ~\$10,000 budget while contributing to the build.

### Unreal Engine Developer / Independent Product Owner | Indie

January 2020 — Present

- Networked multiplayer with server authority and cloud player data; 3 published Android titles.

### Media Team Lead | Resala Charity Organization, Egypt

January 2020 — December 2020

- Led the media function; completed a six-month leadership and management programme.

## KEY PROJECTS

- **HMS — Multi-Tenant ERP** — FastAPI · PostgreSQL (RLS) · React · Docker; ZATCA Phase 1 e-invoicing, RBAC, Arabic/English RTL.
- **AuraGift — Live E-Commerce** — JavaScript · Node.js · Firebase Cloud Functions; serverless orders/payments, zero-downtime deploys.
- **High-Throughput Sorting-Center Digital Twin** — Python · Three.js · discrete-event simulation; ~96,400 items/hour, 530+ tests.
- **Fracture Detection AI** — EfficientNet-B0 + Grad-CAM; 90.21% accuracy. Research software, not a certified medical device.

## EDUCATION

**Bachelor — Computer Science & Engineering**, Tomsk State University of Control Systems and Radioelectronics (TUSUR) · 2026 ·

Unreal Engine course author (Udemy, 2024) · Digital Marketing (Google, 2021)

## LANGUAGES

**Arabic** — Native · **English** — C2, full professional · **Russian** — B2, upper-intermediate
