PROFILE

Full-stack software engineer with 3+ years building and shipping web, mobile and AI-enabled products end to end — architecture, backend APIs, frontend UI, automated tests and deployment. Sole owner of a multi-tenant ERP on FastAPI + PostgreSQL + React, and of a live e-commerce platform with zero-downtime releases. I take a feature from requirements to production, and have led teams of up to 10 when a project needed it. Available remotely worldwide, on-site or hybrid; open to relocation.

SELECTED HIGHLIGHTS

- Sole owner of a **multi-tenant ERP** (inventory, procurement, sales/CRM, finance, HR) on FastAPI, PostgreSQL and React, with tenant isolation enforced by PostgreSQL Row-Level Security at the database layer.
- Own the client side and UX of a **live e-commerce platform**, with serverless Node.js order/payment logic on Firebase and a repeatable zero-downtime deploy pipeline.
- Built a **400-lane logistics digital twin** modelling ~96,400 items/hour, with a browser 3D view (Three.js) and 530+ automated tests.
- Shipped a published **medical-imaging AI** product end to end: 90.21% accuracy, Grad-CAM, Streamlit app and Telegram bot.
- Led a team of **10** on an AI logistics system (~\$13,000, 11 months) and a team of **8** on a corporate web product (~\$10,000 budget).

SKILLS

Frontend	JavaScript, React, Three.js, Flutter/Dart, responsive UI, cross-browser development
Backend	Python, FastAPI, Node.js, Firebase Cloud Functions, REST APIs, Clean Architecture, RBAC, multi-tenant
Databases	PostgreSQL, SQLAlchemy, Redis, SQLite, Row-Level Security
DevOps & tooling	Docker, Git, CI, Pytest, Ruff, MyPy
Also	PyTorch, computer vision, reinforcement learning, Grad-CAM, Unreal Engine 5; team leadership, budget ownership

EXPERIENCE

Full-Stack Developer / Technical Owner | HMS

January 2024 — Present

- Own the corporate web product end to end — requirements from stakeholders, architecture, front and back end, release and support.

Full-Stack Developer / Product Delivery Owner | AuraGift

January 2024 — Present

- Own the client side and UX of a live premium e-commerce platform; repeatable Firebase deployments with no downtime.

Technical Project Manager / Product Engineer | Freelance

June 2022 — Present

- Single point of accountability from discovery and SRS through architecture, build and handover.
- Led a team of 10 on an AI logistics system, ~\$13,000 budget, 11 months.

Technical Project Lead / Full-Stack Developer | HMS

January 2023 — June 2023

- Led a team of 8 and managed a ~\$10,000 budget while contributing to the build.

Unreal Engine Developer / Independent Product Owner | Indie

January 2020 — Present

- Networked multiplayer with server authority and cloud player data; 3 published Android titles.

Media Team Lead | Resala Charity Organization, Egypt

January 2020 — December 2020

- Led the media function; completed a six-month leadership and management programme.

KEY PROJECTS

- **HMS — Multi-Tenant ERP** — FastAPI · PostgreSQL (RLS) · React · Docker; ZATCA Phase 1 e-invoicing, RBAC, Arabic/English RTL.
- **AuraGift — Live E-Commerce** — JavaScript · Node.js · Firebase Cloud Functions; serverless orders/payments, zero-downtime deploys.
- **High-Throughput Sorting-Center Digital Twin** — Python · Three.js · discrete-event simulation; ~96,400 items/hour, 530+ tests.
- **Fracture Detection AI** — EfficientNet-B0 + Grad-CAM; 90.21% accuracy. Research software, not a certified medical device.

EDUCATION

Bachelor — Computer Science & Engineering, Tomsk State University of Control Systems and Radioelectronics (TUSUR) · 2026 •
Unreal Engine course author (Udemy, 2024) • Digital Marketing (Google, 2021)

LANGUAGES

Arabic — Native • **English** — C2, full professional • **Russian** — B2, upper-intermediate
